Final test

Customer satisfaction questionnaire

Duration

The estimated duration of this eLearning module is circa 4/6 hours.

Please note that the effective duration of the learning process is influenced by some different factors:

- the initial background in this field
- the study method
- the attention dedicated to more readings such as in depth contents, useful links, etc.

Participants

Eligible beneficiaries are the EU Member States' and Candidate Countries' National Authority staff, as well as Third Countries participants dealing with Food Contact Materials issues.
